Game Result/s Magpies 69 v Firebirds 61			EBMS No. 169175

#### **Event Overview**

#### **Event Overview**

On this cold and rainy Easter Sunday, John Cain Arena welcomed back the Collingwood Magpies who hosted the Queensland Firebirds for Round 4 of the SSN Season.

Game day planning occurred with the Magpies team earlier this week to finalise activation and event bump in requirements- nothing out of the ordinary from the previous two games. Continuing the Easter theme, the Magpies had arranged for an Easter Bunny to roam the concourse handing out miniature easter eggs to all the kids.

Courtside guests were treated to a food drop in their seats as well as floor bar access throughout the game.

Both ingress and egress were smooth at Gate 6 with no large lines.

The Magpies take the win this afternoon and will be back celebrating their ANZAC Day game on Tuesday 25 April against the Sunshine Coast Lightning at 1pm.

#### **Event Management Summary**

#### Entry & Exit

Ingress: Gate 6. Long queues started forming at 18:30 making their way onto GSO. Staff deployed to handscanning and queue management team assisted with moving the crowd along and into the runs more quickly. Lines moved quickly and steady from 18:45.

Egress: Gate 6 and 7 East and West

#### Ticketing

Fully ticketed event. Allocated reserved seating on floor, lowers, mezz and uppers.

No ticketing issues on the night.

#### Venue Management

Recommended to relook at gate structure at Gate 6 for sold out events. Need to assess opening additional Gate at 7 East or West to assist with late arriving crowd. JCA Team to reassess

#### Operations

Production Manager was clear from the beginning with his requirements. This made the day run extremely smoothly for the Operations Team. All additional calls throughout the evening were actioned quickly.

## **Problem One:**

How do we run our Control Centre and our events better?

## **Evolving for Success**

- Support our people using the product
- Leverage the team to improve the product
- Enabling champions

How do we run our Control Centre and our events better?

## Where do we want to go next?

## SOLUTIONS & PROBLEM SOLVING Integrating an IMS with Ticketing Data and Body Cams

#### Integrations & Implementations

- Understanding the Guest Interaction Workflow
- Driven by Safety and Event Security Director + Special Projects Lead
- Outsize Benefits of Integration Quickly Made Clear

#### Results:

- **<u>REDUCTION of 98.75%</u>** on Time Spent Linking Incidents to Videos
- Scalable, Real-Time, In-Event Investigation
- Best Practices for Addressing Fan Interactions
- Guest Encounter Preparation & De-escalation
- Streamlined Fan Conduct Reporting

# **GUEST IDENTITY INTEGRATION**

Using Fan identity to create Investigative Identity in your Incident Management System

#### **Automated Caller-ID** With Real-time lookup, In Event Labels, and Contact Import
